INTRODUCTION

Regardless of its degree of urbanization, no nation can be completely free from concerns regarding the management of its agricultural base and welfare of its rural population. Agriculture in India is on the threshold of change. It has witnessed tremendous increase in agricultural production in the last four decades owing to the generation of better scientific technology in crops, animals, fisheries, agro-forestry, land and water management, input use, control of pests, etc. Notwithstanding these developments, a better management of research, education, and transfer of technology systems in agriculture has become the need of the hour for efficient utilization of scarce resources.

In 1974, the National Commission on Agriculture (NCA) strongly recommended that the scientific organizations and institutions should be managed by farm scientists, and to enable them to do a better job they must be professionally trained in the area of management, as it happens in many other sectors of development. For strengthening the management culture in agriculture, the NCA recommended the establishment of an all India institute for administration and management in agriculture. The National Academy of Agricultural Research Management (NAARM) was, thus, established in 1976 to cater to the felt needs of providing training in the areas of agricultural research and education management.

NAARM is one of the constituent institutions of the Indian Council of Agricultural Research (ICAR), which functions under the aegis of the Department of Agricultural Research and Education (DARE), Ministry of Agriculture, Government of India. NAARM is the apex body of the country working in the areas of management of agricultural research, education, training, and extension to meet the following objectives:

OBJECTIVES

The Academy has been established with the following specific objectives:

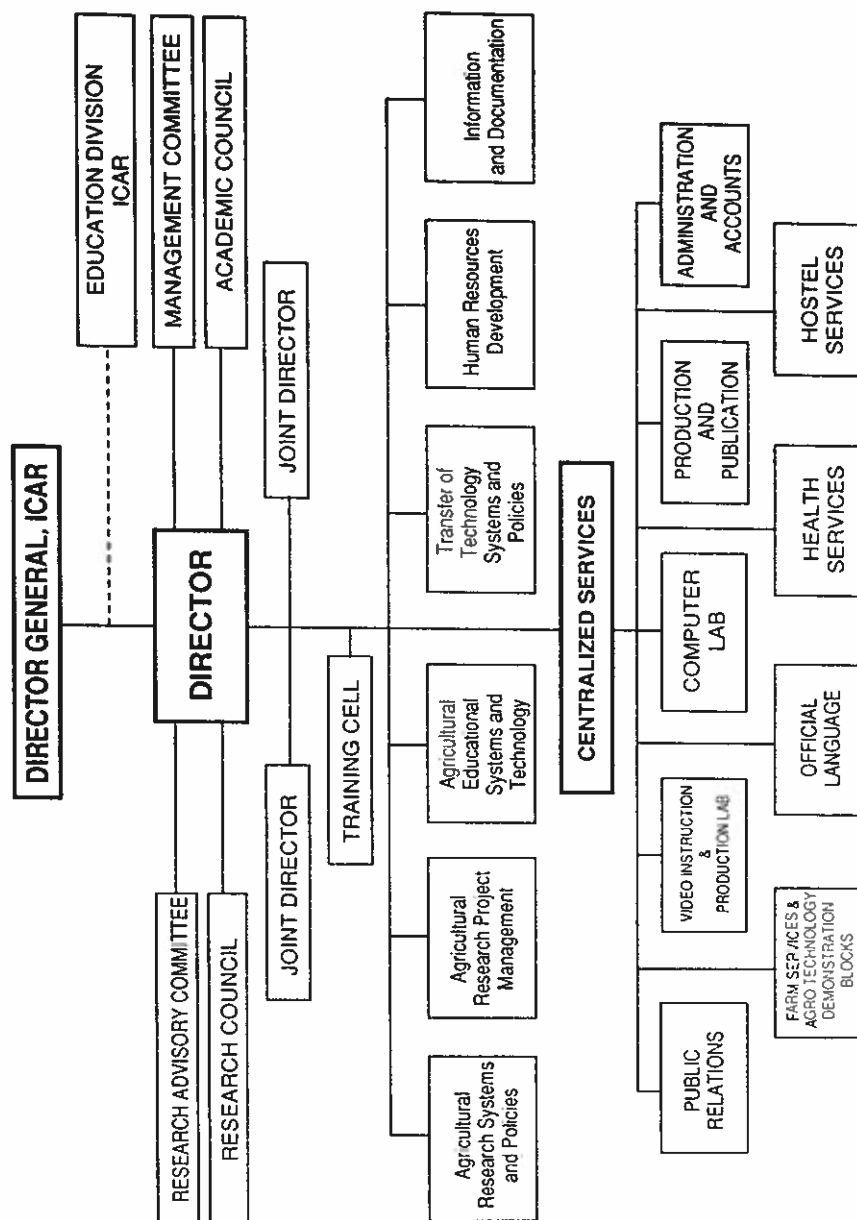

- * To organise foundation courses for new scientist cadre entrants to the Agricultural Research Services of ICAR*
- * To organise Seminars, Conferences and Workshops on all aspects relating to Agricultural Research Management.*
- * To organise and develop training programmes in Agricultural Research Management for senior and middle level scientists of ICAR institutes .*
- * To build up high quality resource material in the subject of Agricultural Research Management based on actual field experience.*
- * To undertake a systematic review and study of management problems of ICAR Research Institutes, Agricultural Universities, Agricultural Research Projects and Systems,*
- * To organise , liaise and coordinate programmes of international co-operation in the field of Agricultural Research Management.*
- * To undertake a programme of publishing high quality training material related to Agricultural Research Management,*
- * To plan, organise and conduct training programmes, workshops and seminars in Educational Technology, Curriculum development and structured learning for the faculty of Agricultural Universities and ICAR Institutes, and*
- * To function as a repository of ideas and information, both national and international in the field of Agricultural Research Management and Education, and develop as a clearing house for dissemination.*

With a view to fulfill its mandate, the Academy is organized into six units of management specializations. These are: Agricultural Research Systems and Policies, Educational Systems and Technology, Transfer of Technology Systems and Policies, Project Management, Human Resources Development, and Information and Documentation units. Each unit comprises a team of faculty members, who are agricultural scientists further trained in the discipline of management. All the activities of NAARM are supported by centralized services such as Administration and Accounts, Farm, Production and Publication, and Hostel Services. The Academy has well-equipped video instructional and production laboratory, audio-visual laboratory including photography and mass communication, computer laboratory with multi-terminal facilities, self-aided instructional laboratory, organizational behaviour laboratory, and a library having information resource laboratory with CD-ROM, audio, video, reprographic, and micrographic services.

The Academy is located in the sylvan environs of Rajendranagar, near Andhra Pradesh Agricultural University (APAU), on the south-western periphery of Hyderabad city. The well-planned campus, spreading over 50 hectares, has several modern buildings including academic block, faculty-cum-laboratory-cum-library-building, administrative block, halls of residence, scientists' home, agro-technology demonstration blocks, and several faculty and staff residences.

An advanced centre on agricultural education and research management, established in 1987 with the assistance of the UNDP, FAO and the ICAR, also functioned at the Academy from 1987 to 1994. The Academy is assisting the deemed-to-be universities, research institutes of the ICAR and the State Agricultural Universities (SAUs) in the management of agricultural research, education, training and extension.

Dr. Jagdeesh C. Kalla, Joint Director was officiating as Director till May 31, 1993 and Dr. C. Prasad, former DDG (Ext. Edn.), assumed office as Director, NAARM from June 1, 1993.

HIGHLIGHTS

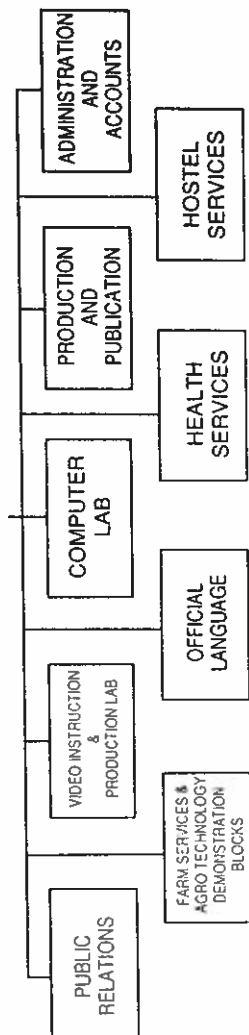

1. Fourteen senior level Agricultural Research Officials from the Ministry of Agriculture, Royal Govt. of Bhutan under the leadership of Mr. D.B. Rai visited the Academy on May 4, 1993 to familiarise themselves with the strides made in the field of Indian agriculture and its allied sectors and modern management practice and policies used in its management. Discussions were held on future collaborative programmes.

2. National Seminar on Women in Agriculture - Developmental Issues was organized in collaboration with National Commission for Women, Govt. of India, International Federation for Women in Agriculture from Dec. 28-30, 1993, to study the strategies for dissemination of information and technologies to farm women and to suggest measures to hasten the process of technology transfer and to understand the issues concerning health, constitutional and legal provision related to the farm women. Over 125 delegates comprising scientists, extension personnel, policy makers, representatives of the NGO's and a few selected progressive farm women participated in the national seminar. Besides an exhibition was organized on the occasion for the benefit of delegates and farm women.

A separate Krishi Mahila Goshti was organized during the seminar, in which large number of farm women took part.

3. First Outreach Programme in Educational Technology (OPET) was concluded. Second OPET Programme was launched during May, 1993. The programme was restructured as Distance Education Programme in Educational Technology and the 1st contact session was organized from May 15-22, 1993.

4. Faculty Development Programme on Animal Sciences Research Management and Educational Technology was successfully conducted for the professors of the Tamil Nadu University of Veterinary and Animal Sciences at its Madras campus from June 15-22, 1993.

5. Training programme on "Technological Forecasting in Research and Development" was organized in collaboration with Technology Information, Forecasting and Assessment Council (TIFAC) and Department of Science and Technology (DST), New Delhi on July 13, 1993. The programme was intended to train the scientists from R & D institutions in the principles of technological forecasting.

6. A three-day National Workshop on "Agricultural Research Evaluation : Methods and Application" was organized from August 17-19, 1993. Dr. Robert Evenson, Professor of Economics, Yale University, was the facilitator.

7. National Conference on "Agricultural Credit System - The Next Stage" was organized jointly by Agriculture Economics Research Association (AERA), National Bank for Agriculture and Rural Development (NABARD) on March 2, 1994.

ACTIVITIES

The Academy organizes various activities related to training, research, education, workshops and consultancy to fulfill the needs of the clientele groups working at various levels of management in the agricultural research and development organizations, and each of these activities is described below:

TRAINING

The Academy imparts training in the areas of research management, educational technology, and training management for various levels of scientists of the ICAR and the SAUs, which form a part of the National Agricultural Research System (NARS). It also conducts training programmes for executives, senior research managers, and administrative and accounts officers.

Foundation Courses

Foundation course is a regular course offered to the scientists recruited to Agricultural Research Service of the ICAR. It is the most important and the largest programme of the Academy. The course aims at providing exposure to the trainees on the concepts and principles of project management with special emphasis on project formulation and implementation. It also includes instruction in related areas on human resources development and management, transfer of technology systems and policies and information management.

Objectives :

- * To acquaint the scientists with the general agricultural scenario in the country and the world with reference to research and development.
- * To equip them with techniques in research project management.

- * To develop skills in organizational behaviour for high motivation, team work, and conflict resolution.
- * To give insight into the rural society and structure.
- * To provide training for communication in agriculture and transfer of technology.
- * To orient the scientists to the ARS of ICAR and the national agricultural research, education and extension systems in the country.
- * To foster a feeling of fraternity among the scientists serving in different parts of the country.

The course is structured into three phases, each covering a duration of seven weeks, and extending for a total period of six months. The first phase of the training is at the Academy and concentrates mainly on the basics of Agricultural Research Management, Organizational Behaviour, Transfer of Technology, Information Management, Admn. & Accounts Procedures. The second phase called Field Experience Training (FET) is held at a regional station of National Agricultural Research Project of the ICAR Institutes and State Agricultural Universities (SAUs). The FET is designed to impart training in project identification and formulation. This phase helps the trainees to develop an appreciation for rural life and environment. In the third phase of training at the Academy, the trainees are given an exposure in areas which would strengthen their skills in scientific writing and presentation and improvement of communication skills.

The overall programme also includes educational visit to various research institutes in and around Hyderabad to familiarize them with different organizations and the research activities. During the period under report, 263 ARS Scientists, freshly recruited into the service, completed their training. Currently 40 ARS Scientists are receiving training. The details are as follows:

S No.	Title of the Programme	Dates	Co-ordinators	No. of participants
FCARPM				
1.	XLIV	12.4.93 to 10.9.93	Dr.A. Gopalam Dr. J. Challa	67
2.	XLV	02.06.93 to 21.10.93	Dr. M.M. Anwer Dr. P. Manikandan	63
3.	XLVI	21.07.93 to 18.12.93	Dr. K.P.C.Rao Dr. D. Rama Rao	74
4.	XLVII	14.09.93 to 09.02.94	Dr. P. Kumar Dr. A.U. Gadewar	59

Senior Level Courses

Research management training is a continuous process of learning and updating different skills, the Academy offers various senior level programmes to different categories of scientists. These programmes essentially aim at developing an appreciation and providing adequate skills to various levels of scientists of the ICAR and SAUs. The trainees of senior courses include Principal Scientists, Professors, Heads of Divisions/Departments, Directors of Research, Project Co-ordinators, Directors of Institutes and Deputy Director - Generals. During the year under report, seventeen senior level programmes were offered which are listed in a table and a brief account of the programmes is as follows:

SENIOR LEVEL TRAINING PROGRAMMES

Sl.No.	Name of the Programme	Date	Coordinators	No. of participants
1.	Course on Agricultural Research Project Management	Apr. 13-23, 1993	Dr. S.N. Saha	48
2.	First contact session of the Second Outreach Programme in Educational Technology for Agriculture	May 15-22, 1993	Dr. A. Gopalam	16
3.	Course on Manpower Planning for Management of Technology in Agriculture	June 3-11, 1993	Dr. VE. Sabarathnam	8
4.	Course on Improving the Efficiency of Office Administration for CAOs, SAOs & Deputy Secretaries of ICAR	June 7-11, 1993	Mr. M. Suresh Kumar	11
5.	Course on Improving the Efficiency of Office Administration for AAOs & Section Officers of ICAR	June 14-19, 1993	Mr. M. Suresh Kumar	16
6.	FDP on Animal Sciences Res. Mgmt. and Edu. Tech. for TNVAS, Madras	June 15 - 22, 1993	Dr. Jagannadham Challa	29
7.	Course on Computer Applications in Agricultural Research Management	June 15-25, 1993	Mr. U. Muralidhar	23
8.	Course on Technological Forecasting in Research and Development	July 13-21, 1993	Dr. D. Rama Rao	20
9.	Computer Applications for Information Storage and Retrieval : An Advanced Course on CDS/ISIS Version 3.0	Aug. 3-13, 1993	Mr. R.B. Gaddagimath	25
10.	Course on Planning and Production of Instructional Videotapes	Sept. 7-18, 1993	Mr. K.R. Prabhakar	25
11.	Course on Management Information Systems for Agricultural Research	Sept. 13-25, 1993	Dr. T. Balaguru	23
12.	Computer Course for NARP Personnel	Oct. 25-Nov. 6, 1993	Mr. U. Muralidhar	31

a) Agricultural Research Project Management

This course exposes research managers to applications of management concepts to agricultural research projects for their efficient implementation and to make them relevant. Various aspects of research project cycle and other related topics like management of differences and brainstorming are covered through information sharing, group discussion, case analysis and exercises.

b) Management of Technology in Agricultural Research Systems through Manpower Planning

The course aims to impart skills to the scientists in the techniques of management of farm technology and manpower planning in order to increase scientific manpower efficiency in research systems. The course was a mix of manpower planning and technology management in agriculture keeping the supplementality of these two areas in agriculture.

c) Improving the Efficiency of Office Administration

The programme aims at strengthening the existing Management Process in ICAR Institutes by imparting training to the Chief Administrative Officers, Senior Administrative Officers and Under Secretaries of ICAR in the areas of Administration and Management. The other course in this area was designed to meet the needs of Assistant Administrative Officers and Section Officers.

d) Technological Forecasting in Research and Development

The programme has been designed to train the scientists from research and development institutions in the principles of technological forecasting. The programme discussed the case studies in Agricultural Universities, in the Veterinary and Engineering disciplines developed by various experts in the country.

e) Computer Applications in Libraries and Information Centres

The programme intended to provide an opportunity to familiarise librarians and information specialists with CDS/ISIS Package for

information storage and retrieval in libraries and information centres. This was to replace the traditional methods of storing and retrieval of information, which have become obsolete. Main emphasis was given on the use of UNESCO's CDS/ISIS Version 3.0 for information storage and retrieval through theoretical orientation, and hands-on experience with computers through exercises. The programme was sponsored by National Information Systems for Science and Technology, Department of Scientific and Industrial Research, New Delhi.

f) Planning and Production of Instructional Videotapes

The course exposed the scientist participants to the concepts of educational video programmes and the creative aspects of them. It also developed the skills for programme production and introduced the participants to the new and emerging areas of video application.

g) Management Information System for Agricultural Research

The course provides guidelines on the methodology for the development of computer based Management Information System (MIS) and Project Budgeting System (PBS) that would ultimately help managers to take timely and meaningful decision on various aspects of research projects, human resources and financial resources. The course enables the participants to develop skills through project work, case study, and hands-on experience with personal computers.

h) Computer Applications for NARP Personnel

The course aims at providing skills to the senior scientists of National Agricultural Research Project centres of State Agricultural Universities of Southern, Eastern and Western Zones, on the use of Computers and different software packages for processing of data and presentation of information. Various user-friendly packages related to word processing, statistical analysis and spreadsheets were covered. A brief account of computer virus and vaccines was also provided. Major emphasis in the course was on hands-on experience with computers for the use of various packages. This training programme is sponsored by World Bank.

i) Training of Trainers

The programme helps the teachers and trainees to improve their knowledge and develop certain specialized skills in order to organize and conduct more effective training programmes. The educational technology utilized in the programme consisted of a blend of lectures, exercises, group discussions and practice sessions to cover various aspects such as basics of training, role of trainers and training design, delivery and evaluation.

j) Orientation Course on Fisheries Extension Education

The orientatic n course on fisheries extension education was organized for the State fisheries department extension officers and assistants as a partial fulfilment of the course conducted by the Central Institute of Fisheries Education.

The course created an awareness about concepts, philosophy and principles of extension, communication, social change, socio-psychological behaviour of the target group, group efforts and programme evaluation methods in Fisheries Extension. It also provided the skills of dealing and managing human resources at operational level, and provided exposure to historical perspectives of fisheries extension, problems and prospects in fisheries sector and participatory information collection tools. The course also provided hands-on experience in audio-visual aids, instructional plans and curriculum development.

RESEARCH

The Academy is the leading institution of the country conducting research in the area of agricultural management. It carries out research in various areas such as agricultural policy, research project management, transfer of technology, human resources management, agricultural education, and information technology. A brief description of the research projects is presented below :

1. Development of database on crops, forestry, animal and fishery resources in National Agricultural Research System
(Dr. P. Kumar)

The project aims at documenting long term trends in the constituents of database on crops, forestry, livestock, fisheries, and animal resources in NARS. The database once developed would be very much useful to different clientele groups (animal scientists, planners and administrators, etc.), and can also be used as teaching material in our training programmes. During the year under report data were collected under ten different heads covering the production and export of animal products at the national and global level. Information was also collected on the output of the agricultural and veterinary colleges of the country.

2. Developing a suitable Management Information System (MIS) for the National Agricultural Research System (Dr. T. Balaguru, Dr. P. Manikandan, Dr. J.C. Kalla and Dr. K.V. Rao)

The methodology for developing the Management Information System (MIS) and the Project Budgeting System (PBS) has been developed. One more case study on MIS for one of the Crops Research Stations in Tamil Nadu was completed during the period. The final publication in the form of a book on the guidelines and two case studies is under progress.

3. Estimation of relation between technology development and technology adoption in Indian Agricultural Research System
(Dr. VE. Sabarathnam)

Even though number of technologies have been developed in agriculture by ICAR Institutes and Agricultural Universities, there is no empirical evidence to indicate how many of the technologies generated are actually adopted at farmers level. Hence, this study was undertaken keeping the following objectives in view:

- * To estimate the relation between technology generated and technology adopted in different agro-climatic zones in the country.
- * To find out the relationship between technologies generated by research institutes and the problems of the farming community.
- * To assess the relation between feasibility ratio of the technology generated and the adoption level of the technologies.
- * To find out the reasons for adoption of single technology and adoption of multiple technologies by the farmers.

During the year under report, progressive villages and less progressive villages around the research institutes were selected, and the farmers were asked to report the technologies which they had adopted out of the technologies developed by the particular research institute that is existing in a particular agro-climatic zone. The relation between the technology developed and adoption has been worked out for thirty agro-climatic zones for different villages. The overall relation for independent agro-climatic zones is being worked out.

4. Rationalization of indigenous technologies in Indian agriculture (Dr. VE. Sabarathnam)

Though technologies are passed on from the research institutes to the fields, farmers continue to have their own technologies which have been passed on from generation to generation within the community itself. No documentation of these technologies in a rationalized way has been done. Keeping this in view, the study was undertaken to collect information on the various indigenous technologies that were being practised by the farmers, for the benefit of extension workers and the researchers engaged in agriculture.

The objective of the study is to rationalize the indigenous technologies, proverbs and beliefs that are in vogue in Indian villages in different states.

During the year under report, indigenous technologies, proverbs and beliefs have been collected from different states like Andhra Pradesh, Tamil Nadu, Madhya Pradesh, Maharashtra, Bihar, Himachal Pradesh, Haryana, West Bengal and Karnataka. The utility value of these technologies is being analyzed and documented.

5. *A profile of scientific and technical human resources in NARS* (Dr. S. Shanmugam and Dr. J.C. Kalla)

The data have been collected from the ICAR Institutes. The work is in progress.

6. *Culture of trust* (Dr. M.M. Anwer)

The project was concluded during the year under report. The study was conducted to understand the nature of interpersonal trust and factors affecting it. The data were collected from 261 agricultural scientists from 15 research institutes belonging to the Indian Council of Agricultural Research. The results indicate that the demographic variables such as qualifications, age, sex, experience and designation had small and statistically non-significant correlations with trust. On the other hand, interpersonal trust had strong and statistically positive correlations with organizational factors and management practices such as perceived fairness in distribution of facilities and opportunities for work, and recognition and rewards, openness, non-authoritarian leadership style and absence of politicking. Interpersonal Trust (IT) level in most of the ICAR Institutes is close to the mid-point of the scale (2.50) which definitely indicates the need to improve.

7. *Communication openness and job satisfaction among scientists in agricultural research organizations* (Dr. J.C. Kalla, Dr. R.K. Samanta, Mr.K.V. Kumar).

(The project was undertaken during 1992-93)

'satisfaction among
ation s (Dr. J.C. Kalla,
992-93)

Organizational environments are becoming more and more complex creating greater uncertainty for any good organization and raising the need for appropriate communication mechanism to implement the decisions that will reduce this uncertainty. The study was undertaken to analyze and document the "Communicative Openness" and "Job Satisfaction" among the scientists working in the ICAR institutes.

Commensurate with the objectives, a specially designed and structured questionnaire was administered to a selected group of scientists in three categories namely, Principal Scientists, including Directors (72) ; Senior Scientists (157) and Scientists (106) in all the constituent organizations of ICAR.

From the study, it was inferred that there was a lack of optimally congenial and healthy communication climate in agricultural research organization in terms of reciprocity, feedback perceptiveness, feedback responsiveness and feedback permissiveness in superior-subordinate communication. This can be attributed to the existence of less than adequate personal relationship between superiors and subordinates, and in a large measure to the absence of effective and meaningful channel of communication. Further, the study conclusively revealed that the degree of satisfaction of the scientists with respect to various sub-components of "Communication" and "Job Satisfaction" in their organizations differs considerably as per their hierarchy and status in the organizations.

8. *Research Study on the Profile of Indian Agricultural Extension System - Organizational Structures, Working Environment, Achievements, Problems and Policy Issues.*
(Dr C. Prasad, Dr R.K. Samanta)

The project work is in progress.

9. *Educational and Training Infrastructure and Mechanisms for Manpower Development in Extension in India and Projection of Future and Policies.* (Dr.R.K. Samanta, Dr.C. Prasad, Dr.A.U. Gadewar)

The project work is in progress.

10. AGRIUNIS (Dr. D. Rama Rao and Mr. U. Muralidhar)

The Agricultural Universities Information System (AGRIUNIS) project was undertaken to study the information on agricultural institutions providing agricultural education in India. To maintain the database, a user-friendly software package was developed, and the orientation training was conducted to train the university employees in use of this software for data-entry and analysis. The data were collected through five different schedules designed to seek information on personal, academic and general, manpower, R&D and budget.

Personal information was collected from the 4200 faculty from the rank of lecturer and above. In the second set of schedules was sent to obtain information about academic, budget, manpower and research activities from concerned university officials at the head quarters.

The data were codified and stored using database files. Structured programming was done for inputting and editing the data. Programs were developed to analyse the data to provide tables for display on screen and printing.

The data were grouped and analysed as the basis of major activities of the Agricultural universities, viz., academic, research, extension and administration. The report is under preparation using the data of 24 universities out of 27 State Agricultural Universities received, was sent to Department of Science and Technology. The report was divided into four activity-based categories, i.e., academic and general information, manpower information, research and development information, and budget information.

11. System Dynamic Evaluation of Sorghum Scenario in India (Dr D. Rama RAO and Nidhi Maheswari)

The research project was conducted to predict the future scenario of sorghum with respect to area, yield, alternative applications, relative cost, the production & consumption patterns and constraints to alternative uses, etc.

Mr. U. Muralidhar)

The sorghum forecast was made using three different methods, viz., system dynamics, Delphi and Trend Extrapolation. The forecast for production of sorghum by all the three methods shows increasing trend for the coming decade; the increase ranges from 3-25% over the present, and the increase in demand will be in non-traditional uses (mainly for feed). The study revealed that breakthrough in other dryland crops will have severe impact on sorghum as such crops are likely to grow at the expense of sorghum.

EDUCATION

Outreach Programme on Educational Technology:

As an apex body of the ICAR meant to offer training programmes and workshops to agricultural research scientists and teachers, the Academy has offered a number of courses on different aspects of educational technology like curriculum development, effective methods of learning-teaching, evaluation and assessment, education, administration, etc. The organizational structure in agricultural universities to transmit the knowledge acquired by the scientists and teachers of the SAUs at the Academy to their colleagues is weak. There is a need to develop suitable technical manpower in agricultural universities, who are in service at the SAUs, and are specialists in their own subject by training them in all the aspects of agricultural education. It is to serve this need for educationally trained technical manpower that the Academy is organizing a Distance Education Programme in Educational Technology under the flexible system of distance education with the following objectives:

To offer an educational programme covering all aspects of higher agricultural education to members of the faculty in SAUs and ICAR deemed universities to produce appropriately trained persons who could serve the needs of these institutions by a) organizing in-service training programmes for the teachers; b) undertaking educational research and c) contributing to the upgradation of educational programmes, learning-teaching activities, etc.

On the basis of previous year's experience and the feed back obtained from the participants, the second Outreach Programme in Educational Technology was restructured and the learning modules were reorganized as a comprehensive resource material basis. Fourteen Senior Associate Professors from various SAUs attended the 1st and 2nd contact sessions. The programme was coordinated by Dr. A. Gopalam.

The programme is of one year duration with 46 reading materials (modules and two projects). Each module a) takes up specific classroom based issues under relevant curricular area of study; b) engages the readers through interactive processes of analysis and synthesis in terms of practice-based principles (praxis); and c) attempts to impart improved teaching competencies among the trainee-members. These modules are organised in five learning packages. The response sheets of each module when completed and evaluated, facilitate the participants to get their learning reinforced. The participants conduct project work (class room based and institute based projects) at their respective Universities and submit their dissertations to the Academy which are evaluated in partial fulfilment of the F.G. Diploma in Education Technology.

Advanced Centre on Agricultural Education and Research Management

An Advanced UNDP Centre was established in 1987 at the Academy with a view to strengthen its capability in performing the activities more efficiently. The strengthening was achieved through (a) faculty upgradation by training in premier management institutions abroad; (b) modernizing the physical facilities; (c) inviting foreign consultants to help the faculty of the Academy to organize specialized training programmes, workshops and seminars; and to develop research programmes in different areas of research management and educational technology.

The policy guidelines for effective implementation of the project at the Academy were provided by a specially constituted Steering Committee which includes eminent persons in research and education management from the ICAR and SAUs with the UNDP representative as a special invitee. Some of the areas which received particular attention at the Centre included research policies, farming systems research, educational technology, instructional methods, curriculum development, educational management, and instructional material resource library.

The Centre has made very significant impact on the quantity and the quality of research and educational programmes designed and implemented by the Academy. The Academy has

built up its capability with the support provided by the Project, and it is now acclaimed as a national resource with international potential in the areas of agricultural research management and educational technology. During the project period, fifteen faculty members visited various Universities in the USA to receive training in specialized areas identified by the Centre. A total of eleven consultants from the advanced countries like the USA and Australia, specially identified by the Centre, visited the Centre and helped the faculty to develop their expertise in different areas of specialization in research management and training. Besides, they also assisted the faculty in designing and conducting various training programmes, workshops, and seminars. Since its inception, the Centre has organized nearly 120 advanced training programmes in which over 2600 senior level scientists were benefitted. The expertise developed by the faculty through advanced training abroad and the close interaction with the invited consultants helped them to develop several innovative research programmes which resulted in the development of high quality resource materials in the form of case studies and instructional aids. The Centre enormously benefitted the Academy in strengthening its existing programmes and also in developing new ones.

With the financial assistance provided by the UNDP Project, the Academy could procure many sophisticated equipment and modern facilities such as Computer Laboratory, Self Aided Instructional Laboratory, Video Instructional and Production Laboratory, Audio-Visual Laboratory and Desk Top Publishing System. In addition, the existing facilities in the Library, Press, and Conference halls also got strengthened.

WORKSHOPS / SEMINARS

To facilitate exchange of information and interaction among the scientists of the National Agricultural Research System, the Academy conducts a number of workshops. These workshops address the areas of current and upcoming interest in the field of agricultural management. During the year under report, six workshops were conducted, the details of which are given in a table:

S.No.	Name of the Programme	Dates	Coordinators	No. of participants
1	Workshop on Management of Agricultural Research Stations	Apr. 6-7, 1993	Dr K. Venkateswarlu	26
2	Workshop on Meaningful Learning through Effective Communication	July 5-9, 1993	Dr R.K. Samanta	16
3	National Seminar on Agricultural Research Evaluation - Methods and Applications	Aug. 17-19, 1993	Dr K.P.C. Rao	35
4	National Seminar on Women in Agriculture - Developmental Issues	Dec. 28-30, 1993	Dr C. Prasad	125
5	Workshop on CDS/ISIS User Group Meet	Feb. 10-13, 1994	Mr. R.B. Gaddagimath	73
6	ICI Co-ordinators Workshop	Mar. 7-8, 1994	Dr K.P.C. Rao	18

1) *Workshop on Management of Agricultural Research Stations*

The workshop was organized to facilitate exchange of practical experiences on management of agricultural research stations through case studies developed for ICAR Institutes, Regional Agricultural Research Stations and the State Agricultural Universities. Several issues related to farm management, organisation, human resources management, management of research and its productivity were discussed during the workshop. The workshop provided an opportunity for the team to work on inventory and

receipts management, and also on aspects related to monitoring and evaluation. Vice-Chancellors, Directors and Senior Scientists from State Agricultural Universities and ICAR Institutes participated in the workshop.

2) *Workshop on Meaningful Learning Through Effective Communication*

The five-day workshop was organized with a view to develop a conceptual and theoretical understanding about instructional learning, and varieties of instructional media used in teaching and training by instructional designers, developers, and practitioners. The workshop stressed on the use of audio-visual media and other teaching aids for effective communication, besides topics on communication skills, communication functions, and communication patterns were also dealt with. Professors, Associate Professors, Principal Scientists, and Senior Scientists of the State Agricultural Universities and ICAR Institutes participated in the workshop.

3) *Workshop on Agricultural Research Evaluation : Methodologies and Application*

The workshop was organized to improve the capacity for economic evaluation of agricultural research projects and programmes in India. Prof. Robert E. Evenson, Professor of Economics, Yale University and UNDP Consultant, facilitated the conduct of the workshop.

The topics covered included a review of the international body of evaluation studies, application, technical research projects, trait evaluation methods using genetic research data and technology ancestry methods for technology measurement. It was recommended that the research studies should focus on technology adoption, data needs, livestock research evaluation, and private sector R & D activities. Thirty-five Directors, Principal Scientists and Senior Scientists of ICAR Institutes and other R & D Institutions participated in the Workshop.

Jayanti Patnaik, Chairperson, NCW, Mrs. Nirmala Deshpande, President, Akhil Bharatiya Harijan Seva Sangh; and in the back row: Dr. C. Prasad, Director, NAARM and Secretary General, IFWA; Dr. Jayant Patil, Member, Planning Commission, and Dr. Jagdeesh C. Kalla, Jt. Director, NAARM.

Dr. C. Prasad, Director, NAARM addressing the delegates at the National Conference on "Agricultural Credit System - The Next Stage". Also seen: Dr. Mruthyunjaya, Secretary, AERA; Dr. C.C. Maji, Vice-president, APFA; Dr. Jayaprakash Narayan, Secretary to Governor, Govt., of A.P.; Dr. Jagdeesh C. Kalla, Jt. Director; Dr. P. C. Rao, Coordinator of the conference.

4) *National Seminar on Women in Agriculture - Developmental Issues*

The seminar was organized to discuss the developmental issues related to the participation of women in agriculture, their needs and expectations and other peripheral issues relevant to the subject. The major issues that were discussed in the seminar were technology generation process and appropriate technology for farm women for reducing their drudgery, health - especially the occupational health hazards, constitutional and legal provisions and functional linkages and relationships between institutions, departments and NGOs dealing with farm women and rural development.

Regarding technology generation process and appropriate technology for farm women for reducing their drudgery, training of farm women for skill development, access to resources and provisions, creation of facilities at village level for women's development, sensitization process for policy makers and administrators; establishment of linkages among various agencies concerned to agriculture, dairy, forestry, sericulture and fisheries; occupational health hazards of women like wage disparities, legal rights, etc., the following suggestions were made:

More awareness should be created at the professional, political and public level about the role of women in agriculture; their needs and problems. There is need for evolving technologies most relevant and suited to women-specific farm activities. Rural women work on two fronts- on farm as well as home. Therefore, technology generation in both the areas should also be the concern of the scientists. The main aim of research relating to agricultural technology, specially for women, should be labour diversification, drudgery reduction, improved energy conservation and higher and more stable income. There should be increased participation of women in every aspect of research, decision-making and technology development.

Senior scientists, extension personnel, policy-makers and progressive farm women took part in the seminar. An exhibition and krishi mahila goshti were also organized simultaneously for the benefit of farm women.

5) *Workshop on CDS/ISIS User Group Meet*

This workshop was organized essentially to ascertain the use, and applications, experiences, ideas about the CDS/ISIS package, and also to share the technical problems encountered by the CDS/ISIS users. This workshop was organized in collaboration with National Information System for Science and Technology (NIS-SAT), and Department of Scientific and Industrial Research, New Delhi. The workshop provided an excellent opportunity to the participants to have hands-on experience with computers. Seventy-three users from all over the country attended the Meet. They were well acquainted with data storage, retrieval, processing, analysis, and documentation of scientific reports.

6) *FET Co-ordinators Workshop*

The Field Experience Training (FET) Co-ordinators workshop was organized to review the experiences of the co-ordinators, and also to discuss the reforms that should be brought about to make it more useful. The workshop provided an opportunity for the coordinators to share their rich experiences with one another, and also with the NAARM faculty.

CONSULTANCY

The Academy provides consultancy services in the area of Agricultural Research Management and Educational Technology. The Academy guides the SAUs and ICAR institutes in conducting training programmes in these areas. The faculty members of the Academy, specialised in various sub-disciplines, deliver special lectures in institutions which organize training programmes for their own staff. These institutions find the participation of NAARM faculty immensely useful.

The following consultancy services were provided by the Academy during the period under report:

1. FDP for TANUVAS (Tamil Nadu University of Veterinary & Animal Sciences, Madras)

At the request of the Vice-Chancellor, Tamil Nadu Veterinary and Animal Sciences University, Madras, FDP on Animal Sciences Research Project Management in Education Technology was conducted in Madras from June 15 to 22, 1993.

The programme was designed to cover three areas, namely HRD, Project Management and Education Technology. Dr J. Challa coordinated this programme. Dr J.C. Kalla, Dr A. Gopalam, Dr K. Venkateswarlu and Mr. M. Suresh Kumar were the other resource persons. Twenty-nine professors of the University participated in the programme.

2. Consultancy to NCERT

In order to help the National Council for Educational Research and Training (NCERT) to study the vocationalization of Agricultural Education Management issues, consultancy was provided by the Academy and four-day National Meet on "The Status and Prospects of Vocational Education Programme in Agriculture" was held from March 15 to 18, 1994. The programme was jointly organised by Pandit Sunderlal Sharma Central Institute of Vocational Education (PSSCIVE), Bhopal. Dr. Jagdeesh C. Kalla,

and Dr. A. Gopalam were Principal Coordinators of the Meet. Dr J. Challa was the resource person.

3. Consultancy to Animal Welfare Board of India

Consultancy was provided to the Animal Welfare Board of India and a three-week "Trainers Training Programme on Animal Welfare" was organized at the Academy in collaboration with Animal Welfare Board of India, Madras and Royal Society for Prevention of Cruelty to Animals (RSPCA), U.K. from February 28 to March 18, 1994. Dr. Jagannadham Challa was the coordinator of the programme. Seventeen animal welfare activists from around the country were successfully trained.

4. Consultancy to Technology Information, Forecasting and Assessment Council (TIFAC) and Department of Science and Technology (DST)

Consultancy was provided to train the scientists in R & D institutes on the principles of Technology Forecasting. A training programme on "Technology Forecasting in Research and Development" was organized at the Academy in collaboration with Technology Information Forecasting and Assessment Council (TIFAC) and Department of Science and Technology (DST) on July 13, 1993. Dr. D. Rama Rao was the coordinator of the programme.

5. Consultancy to Ford Foundation, New Delhi

On the request of the Eastern India Farming Systems Research and Extension Network, a course on improvement of written communication was organised at Ramakrishna Mission, Loka Siksha Parishad, Calcutta from June 8 to 12, 1993. Dr. P. Manikandan and Mr. R.B. Gaddagimath were the coordinators of the course, which was sponsored by Ford Foundation, New Delhi.

6. Consultancy to AERA

system and a two-day national conference on "Agricultural Credit System - The Next Stage" was organized jointly by the National Bank of Agricultural and Rural Development (NABARD) and State Bank of India at the Academy. Dr. Jagdeesh C. Kalla and Dr. K.P.C. Rao acted as coordinators of the conference.

7. Consultancy to other training institutions

The Academy provided expertise in the form of guest lectures to other local training and educational institutions such as the Extension Education Institute, the Home Science College of the Andhra Pradesh Agricultural University, S.V.P. National Police Academy, Institute of Cooperative Management, Regional Station for Forage Production and Demonstration, International Crops Research Institute for the Semi Arid Tropics, MANAGE, State Bank Institute of Rural Development, WALAMTARI, NISIET, and NIRD. Most of the faculty members of the Academy were invited to deliver guest lectures in the above mentioned institutions. Subjects covered in these lectures were from the different areas of management and educational technology.

MISCELLANIA

Foundation Day of NAARM :

The Eighteenth Foundation Day of the Academy was celebrated by the NAARM Recreation Club on Sept.2, 1993. Swami Paramarthananda of Ramakrishna Math inaugurated the celebration. In his inaugural address, he spoke at length about character building, and asked the Agricultural Scientists to work with dedication to a purpose and not by compulsion. For success, he said, one must be ready to pay the price which includes braving failures and setbacks, and persisting with efforts till the goal is won. He quoted Swami Vivekananda and said, "Bring light to the uneducated and bring more light to the educated. Give the World the best you have and the best will come to you. All that you send into the lives of others comes back into your own".

On the occasion, Dr. M. Rajagopalan and Dr. K.V. Raman, former Directors; Dr. K.V. Subba Rao, Professor(Retd.); Mr. M.S. Gupta, Sr. Admn. Officer (Retd.); Mr. P.V.R. Murthy, Asst. Accounts Officer (Retd.); and other former officials were felicitated and citations were presented to them.

Earlier, Dr. C. Prasad, Director and President of NAARM Recreation Club welcomed the gathering. Mr. R.B. Gaddagimath, General Secretary, NAARM Recreation Club gave a brief account of NAARM and its development. Mrs. Padma Saroja, Vice-President of the Club proposed vote of thanks. The day-long celebrations also included an open house interaction by the staff and trainees on the theme of "NAARM of my dreams" followed by a cultural evening of songs and music by the staff and trainees of the Academy.

Official Language Implementation activities :

Hindi Week Celebrations :

Hindi Week Celebrations were organised from Sept. 7 to 14, 1993 under the chairmanship of Dr. C. Prasad, Director, NAARM. The Chief Guest of the concluding function on Sept. 14, 1993, Shri

Academy was celebrated on Sept. 2, 1993. Swami Paramarthananda of Ramakrishna Math, inaugurated the celebrations. He spoke about character and the need to work with dedication to achieve success, he said, one must learn from past failures and move on. He quoted the uneducated and the best you have put into the lives of

Dr. K.V. Raman, (Retd.); Mr. M.S. /R. Murthy, Asst. Officials were felicitated.

President of NAARM R.B. Gaddagimath, gave a brief account of the day-long celebration by the staff and trainees of the

Swami Paramarthananda of Ramakrishna Math, lighting the lamp to mark the inauguration of the Foundation Day celebrations of the Academy. To his left are: Dr C. Prasad and Dr Jagdeesh C. Kalla, Director and Jt. Director, NAARM respectively.

B.S. Kashane, News Editor of Dainik Hindi Milap, Hyderabad stressed the importance of Hindi which, he said, was widely known even in South India and if any opposition is there, it is from the leaders, but not from the people. Dr. J.C. Kalla, Joint Director and Chairman, Official Language Implementation Committee of the Academy said that mother of all languages is Sanskrit. But in Hindi, one finds several words of different Indian languages, besides Sanskrit. A link language is essential to bind all the people of the country together and that binding force as link language is Hindi, he emphasized. Dr. A. Gopalam, Officer-in-charge, Hindi and Vice-Chairman of Official Language Implementation Committee of the Academy gave detailed account of various activities and achievements of Hindi Section. Dr. C. Prasad, Director, in his presidential address advised the staff members to discharge their duties in Hindi. On this occasion, various competitions like essay writing, elocution, typing, translation of words, noting & drafting, recitation of poetry, singing, etc., were organised and prizes were distributed to the winners.

Workshops :

Two workshops in Hindi were conducted from November 4 to 6, 1993, one on the simplification of scientific and technical terms, and another for employees of the Academy on official Hindi usage such as noting & drafting, letter writing, etc.

Rajbhasha Shield to NAARM :

The Academy was awarded the rolling shield for the year 1992 by the Town Official Language Implementation Committee, Hyderabad in recognition of the best performance in implementation of the Official Language Policy among the 225 central government organisations situated in the twin cities.

Sports

NAARM bagged the Shuttle Badminton Title:

The NAARM contingent of sports which participated in the ICAR Inter-Institutional Sports Meet held in Trivandrum from De-

cember 7 to 11, 1993 won the title in shuttle badminton, and also emerged runners-up in volley ball. The contingent was led by Dr. Jagannadham Challa, Chairman, Sports Committee of NAARM.

FACILITIES AND SERVICES

In order to organize the training programmes, seminars and high level workshops more effectively and to undertake research projects, the Academy has designed the following Laboratories to meet the requirements of different training programmes.

Facilities

Academic Block:

The Academic Block houses four well-equipped and air-conditioned lecture theatres, two discussion rooms, and a poster presentation display area. Each lecture theatre accommodates up to 60 trainees. The lecture theatres are provided with projection and display facilities, and other teaching aids.

Conference Hall:

The Conference Hall is professionally designed, and has a fixed arrangement of furniture. It is equipped with public address system, a dais and a lectern. The Conference Hall has a seating capacity to accommodate about 120-150 people. Conference microphones, audio recording, and projection facilities are installed in the hall to facilitate effective communication.

Committee Room:

The Committee Room is uniquely designed, and is equipped with conference microphones, a slide projector, an overhead projector, and a video projector. The round table seating arrangement in this room facilitates better interaction for small meetings. This hall can seat about 50 people.

Faculty Seminar Hall:

A centrally air-conditioned faculty seminar hall is available in the faculty building for conducting seminars, meetings, group and panel discussions. This seminar hall seats about 30-50

participants. The hall has movable furniture which can be arranged as per the requirements of the event. It is equipped with a chalk-board and display boards. Projection facilities for overhead transparencies and 35-mm slides are also provided. Video tape viewing through monitors can also be arranged. A centrally air-conditioned, comfortably furnished lounge of equal seating capacity is attached to this seminar hall, which is used for light catering and informal discussions.

Photography Laboratory:

The Photography Laboratory is equipped with all modern photography equipment for black-and-white photography, processing and printing. The laboratory is primarily used for training probationary Scientists of Agricultural Research Service and provides photographic services for all other programmes of the Academy.

Audio Visual Laboratory:

The audio visual laboratory is equipped with all modern equipment for audio visual production. The laboratory provides training in the operation of various audio visual (A.V.) equipment, and also in A.V. aids production to the participants of various training programmes. It also provides A.V. aid services to all other programmes of the Academy. This laboratory is equipped with overhead projectors, an epidiascope, a colour-transparency making unit, a slide projector, a tape recorder, a 16-mm projector, and a public address system.

Organizational Behaviour Laboratory :

The Organizational Behaviour Laboratory consists of two laboratories, one large and one small group process rooms. These are used for administering psychological instruments, group exercises, and organizational process games. The laboratories are furnished with a set of specially designed light and movable furniture, which can be arranged and rearranged to facilitate both large and small group sittings.

ed to facilitate both

The video equipment is extensively used for the purpose of providing feedback on individual exercises, group processes, and organizational games.

Video Instruction and Production Laboratory Complex:

This complex has two well-equipped video studios and one master control room. These are equipped with U-matic 3-colour video system. This system comprises four U-matic cameras, portable and table model video cassette recorders, an audio mixer, editing controllers, a micro-computer for character generation, a sync. generator, and a multiplexer (tele-cine equipment) for transferring films and slides to video format.

The laboratory is used for video programme production, providing training in video programme production, and providing video feedback as a part of the various training activities in the different courses of the Academy. The laboratory also provides video coverage of important functions of the Academy for the purpose of telecast.

Self Aided Instruction Laboratory:

Self-aided instruction facilities have been developed in this laboratory for providing the teaching-learning to a variety of learners and for promoting a flexitime, flexiduration upgradation of their capabilities. The laboratory has six learning stations, each equipped with a tape slide projection system, an audio-tape recorder, a 3/4" and 1/2" video monitor, and a computer integrated through headphones in order to impart computer-aided instruction, video tutorial, tape-slide presentations, and audio-tutorials. This laboratory has a facility to bring all the learners to a common discussion table which further strengthens the process of instruction. A number of self-learning demonstration modules have been developed using computer and video as carriers. The laboratory is used to provide training in the production of such self-learning modules.

Library:

The Academy has established a specialized and well organized library to meet the information needs of the faculty members, staff, visiting scientists and trainees. Specialized collection focuses on agricultural research management, science policy, systems studies, project management, futurology, forecasting, educational technology, teaching, transfer systems/policies, women studies, information management, research communication, computer/information technology, human resource development, administration, etc. An international corner, foreign tour reports section, and information cell on training and education abroad are the unique sections of the library. About 400 titles were added during the year. The library now holds about 20,000 books and subscribes to 425 journals/serials.

The library has database services, information resource laboratory, learning resource laboratory, and a micrographic, reprographic, and video library. Library books now can be accessed through computer using UNESCO's Package (CDS/ISIS) V.2.32. Plans are on for providing LAN facilities for other in-house activities.

The library has a User Instruction and Information Resource Laboratory which provides training to the users in the access of information. A CD-ROM work station with a Hitachi CD-ROM drive and a DCM TURBO 2000 PC-AT has been established in this laboratory for this purpose. Plans are on to procure current and archival discs of many databases useful for agricultural scientists (CAIB, AGRICOLA, AGRIS, TROPAG, SCI, ERIC, MEDLINE, DAI, World Bank Agriculture disc; Peterson guides; etc.). At present only AGRIS demo disc is available, which is used in training programmes.

The General Information Service Terminal of National Informatics Centre (GISTNIC), installed in the library, makes available basic information about India, important national and

international information, viz., agricultural/census/economic statistics, railway/air time table, recreational and tourist information. GISTNIC terminal at the Academy is extensively used for supplying statistical information to the scientist trainees, faculty and staff of the Academy.

A secondary publication titled Agricultural Research Management Abstracts (ARMA) is brought out by the Information and Documentation Unit.

Computer Laboratory:

A computer laboratory has been established with specially designed furniture to accommodate the Mini Frame computer with 4MB RAM and 300 MB Hard Drive along with 20 personal computers. Along with the system, three dot-matrix printers, two near-letter quality printers of FX Series and one ink jet-printer have been acquired.

These systems are mainly used to provide intensive training on computers to the participants from ICAR and State Agricultural Universities at different levels through various courses and workshops on Management Information System, Computer applications, Computer Aided Instruction, Library applications, etc. Softwares like DOS, WINDOWS, UNIX, CLIPPER, WORD PERFECT, QPRO, LOTUS 1-2-3, REFLEX, dBASE, HARVARD GRAPHICS, PILOT STORY BOARD, CDS/ISIS, etc., have been loaded in all the personal computers for effective use in training as well as for day to day activities. Further, they are put into extensive use for the preparation of data bases, development of library information system, etc. The computers are also being used for the administrative work particularly in preparation of pay bills, accounting and budgeting, recruitment processing and for the secretarial work. Necessary training is also imparted to the staff on the use of application packages like Wordperfect, dBASE and Lotus with the aim of increasing the efficiency of their working conditions. There is a proposal to upgrade the Computer Laboratory to take care of the areas like Artificial Intelligence/Expert Systems, Multimedia and Geographic Information System. In order to achieve this, one PC-AT-486 and 5 PC-AT-386 along with necessary softwares are being procured.

Services

Administration, Finance and Accounts:

This wing of the Academy is organized into five sections: Administration I deals with establishment matters; Administration II with cash and bills; Administration III with stores and purchases; Administration IV with estate management and training; and all matters pertaining to expenditure and bank reconciliation statements, monthly and annual accounts, budget and revised estimates, internal audit etc are dealt with by the audit and accounts section.

This wing provides administrative, financial, and accounts support to all the units of the Academy. Further, the Chief Administrative Officer and the Finance and Accounts Officer function as regular faculty members in delivering lectures on various rules and regulations of ICAR to ARS scientists and other trainees.

Farm Services:

The Academy has developed the Agro-Technology Demonstration Blocks (ATDB) in an area of 30 hectares, which act as the show-window of the National Agricultural Research System. The concept of ATDB is a unique innovation where the technologies developed and released by different ICAR institutes and SAUs are demonstrated at one place for the benefit of national and international visitors. During the year under report, about 2000 visitors and 300 scientist trainees had an opportunity to view these demonstrations.

Production and Publication Services:

The Production and Publication Cell undertakes publication of various materials developed by faculty for training purposes. The cell is equipped with Desk Top Publishing (DTP) System with several packages including MS Word, MacWrite, MacPaint, Mac Draw, Page-Maker and Hindi'Font. This cell is equipped with an offset printing press (Swift 300 Delux) processing camera, plate making, screen printing, and binding systems.

Hostel Services:

The Academy's programmes are fully residential, and the training participants are accommodated in the Halls of Residence and in the Scientists Home. These residential facilities have excellent catering services, which provide Indian, Chinese, Mughlai and Continental cuisine. The Halls of Residence contain 154 fully furnished single occupancy rooms with attached bath. The Scientists Home has 32 suites. Each suite is furnished with two beds, sitting and study areas and an attached bath. Half of these suites are air-conditioned. There is a public call office in the Halls of Residence with STD/ISD facility.

Banking Service :

The Central Bank of India, Golconda Fort Branch, Hyderabad has been operating an Extension Counter (regular) in the faculty-cum-laboratory building to cater to the banking requirements of faculty members, staff and trainees. The counter also offers safe deposit locker facility to the faculty and the staff members.

Health Services:

The Academy has a Health centre with a doctor and a compounder. The centre provides out-patients care to all probationers, faculty, staff and their families during scheduled hours. Emergency care is provided round-the-clock.

Hindi Cell:

The Hindi Cell of the Academy discharges the constitutional obligation of implementing the official language policy and rules and regulations of the Govt. of India issued from time to time. The Cell also brings out publications like NAARM Bulletin, NAARM News and Annual Report in Hindi.

Public Relations Cell:

Public Relations is an aid to management and a promoter of understanding at international, national and local levels. The cell, besides building the image of the Academy, also provides faculty support in the areas of publicity, media coordination, visitors coordination, Graphics art aid and arranging all Academy guest lectures. The cell also arranges cultural programmes, field trips and sightseeing programmes.

Other facilities:

Residential Facilities:

The Academy has a total of 95 residential quarters of different categories for the purpose of accommodating scientists, technicians, and staff of NAARM and other ICAR institutions in Hyderabad.

Recreation and Sports Facilities:

The recreation facilities provided include several televisions connected to a dish antenna, common rooms with indoor games, and courts for tennis, volley ball and badminton.

iii. Papers presented in seminars, conferences and workshops

1. Prasad, C. 1993. "Transfer of Technology strategy for sustained oilseeds production in India" in ISOR National Seminar on "Oilseeds Research & Development in India: Status and Strategies" from Aug. 2 to 5, 1993 held at Directorate of Oilseeds Research (DOR), Hyderabad.
2. Rao, K.P.C. and Kalla J.C. 1993. "Sustainability of Oilseeds Production System in India - an Economists' View" in ISOR National Seminar on "Oilseeds Research and Development in India : Status and Strategies" held from August 2 to 5, 1993 at Directorate of Oilseeds, Hyderabad.

3. Challa, J. and Kalla, J. C. 1993. "Intellectual property rights vis-a-vis Indian Agriculture: A view point" in the National Workshop on "Agricultural Research Evaluation: Methods and Applications" held at the Academy from Aug. 17 to 19, 1993.
4. Prasad, C., Samanta, R.K. and Gadewar, A.U. 1993. "Agricultural Extension Studies - Indian Experiences," in the National workshop on "Agricultural Research Evaluation: Methods & Applications" held from August 17 to 19, 1993 at the Academy.
5. Rao, K.P.C., Robert E. Evenson and Mark W. Rosegrant, 1993 "Determinants of Total Factor Productivity Growth in Indian Agriculture" co-authored with and another paper entitled, "Varietal traits of Rice and their Contribution to Productivity in India" in the National Workshop on "Agricultural Research Evaluation: Methods and Applications" held at NAARM from August 17 to 19, 1993.
6. Challa, J. 1993. "Do Animals have Rights - Why Animal Welfare?" in the seminar on "Animal Welfare and Ethics on Animal Experimentation," held at National Institute of Nutrition, Hyderabad on Sept. 16, 1993 to commemorate the platinum Jubilee of NIN.
7. Suresh Kumar, M. and Kalla, J.C. 1993. "Role of Animal Welfare Board of India and the Society for Prevention of Cruelty to Animals " in the Seminar on "Animal Welfare and Ethics on Animal Experimentation" held at NIN, Hyderabad on Sept. 16, 1993.
8. Kalla, J.C. 1993. "Present work and future priorities in Agricultural Economics Research," in the workshop held at National Centre of Agricultural Economics and Policy Research, New Delhi on Sept. 21- 22 , 1993.
9. Samanta, R.K. 1993. "Impact of Training for Extension personnel at EEIs, ATCs and STIs" in the workshop "Training for Agricultural development in the context of available and emerging technologies and policies" at MANAGE, Hyderabad on Sept. 24, 1993.

10. Chelvan, R.C. and Anwer, M.M. 1993. "Video technology in horticulture instructions, training and practice" in the international conference on "Recent Trends in Education and Training Technology" organized by the All India Association for Education Technology in New Delhi from Oct. 28 to 30, 1993.
11. Gopalam, A. 1993. "Planning and designing on computer assisted learning module for an under-graduate course; aminoacids" in the international conference on "Recent Trends in Education and Training Technology" organized by the All India Association for Education Technology in New Delhi from Oct. 28 to 30, 1993.
12. Rao, K.P.C. 1993. "Women as Catalysts of Agricultural Development - A Case Study" at the National Seminar on "Women in Agriculture : Developmental Issues" organized by the National Commission for Women, NAARM and International Federation for Women in Agriculture in the Academy from December 28 to 30, 1993.
13. Rao, K.P.C. 1994. "India's liberalisation policies and dilemma on Dunkel Draft" in the third academic conference of AMDISA held at Dhaka, Bangladesh from Feb. 4 to 7, 1994. He also presented a case study on "Women as prime movers of rural development - Explorations of Bhagavatula Charitable Trust, Yelamanchili, Visakhapatnam Dt., AP" at Dhaka during Feb. 8-12, 1994.
14. Gadewar, A.U. 1994. "Extension Methods for Conducting Frontline Demonstrations and Feedback" in the Training Manual on "Technical Planning of Frontline Demonstrations in Oilseed Crops" held from February 23 to 26, 1994 at DOR, Hyderabad.
15. Gadewar, A.U. and Singh Y.P. 1994 "Attributes of Training and Visit System of Extension and Effectiveness of Monthly Workshops", in Seminar on Training and Visit System - Prospects and Retrospects held in February, 1994 at MPKV, Rahuri.
16. Challa, J. 1994 "First-Aid in Animals" at the National Animal Welfare Trainers' Training Programme, sponsored by

AWBI, Madras and RSPCA, U.K. from February 28 to March 18, 1994 at NAARM, Hyderabad.

17. Challa, J. 1994. "Needs and Prospects for Skilled Manpower in the Domain of Bio-technology" at the National Meeting on "Status and Prospectus of Vocational Education Programme in Agriculture" held at NAARM from March 15 to 18, 1994, jointly organised by Pandit Sunderlal Sharma Central Institute of Vocational Education (NCERT), Bhopal and NAARM, Hyderabad.

iv. Faculty Participation in Seminars, Conferences and Workshops :

1. Dr. K.P.C. Rao participated in Seminar on Planning for Total Employment in Chittoor District organised by Rajaji Institute of Public Affairs, Hyderabad at Tirupati from June 3 to 4, 1993.

2. Dr. P. Manikandan participated and acted as a resource person in the Workshop on "Improved Written Communication" organized with the help of the Ford Foundation at Ramakrishna Math, Narendrapur, West Bengal from June 8 to 12, 1993.

3. Dr C. Prasad participated as chief guest in the workshop on "Planning and Implementation of Integrated Development Projects for land reforms beneficiaries" at the National Institute of Rural Development (NIRD), Hyderabad, on July 20, 1993.

4. Mr R.B. Gaddagimath participated in the Workshop on "Information Network for Rural Development," held at the National Institute of Rural Development (NIRD), Hyderabad, from July 26 to 28, 1993.

5. Dr. C. Prasad and Dr A.U. Gadewar participated in the workshop "Farming Situations Based Extension " held from July 29 to 30, 1993 at MANAGE.

6. Dr.V. Raghavendra Rao participated in the National Seminar on "Oilseeds Research and Development in India" held at Directorate of Oilseeds Research, Hyderabad from August 2 to 5, 1993.

7. Dr K. Venkateswarlu attended a Seminar on "Creativity and Scientific Research" held on August 2, 1993 at the National Institute of Science, Technology and Development Studies, New Delhi. Dr. K. Venkateswarlu attended a workshop on "Creativity, Technology productivity justice" organized by National Academy of Social Sciences at Bangalore from Aug. 10 to 15, 1993.
8. Dr T. Balaguru participated in the International Conference on "Improving performance of NGOs in Development," organized by the Programme Assessment and Development Services at Bangalore from Aug. 21 to 22, 1993.
9. Dr. C. Prasad chaired the session on "Technology Transfer: the Extension system and its broad basing and training needs at various levels" in the workshop on "Training for Agricultural development in the context of Available and Emerging Technologies and Policies" on Sept. 24, 1993 at MANAGE, Hyderabad.
10. Mr. R.B. Gaddagimath and Shanmuganathan, T., attended the HYLIBNET Workshop on October 11, 1993 held at Osmania University, Hyderabad.
11. Mr. R.B. Gaddagimath attended the International Conference and Exhibition on Database Production and Distribution :Resources, Technology and Management (INFOTEX) from November 28 to December 1, 1993 organised by Informatics India Pvt. Ltd. Bangalore and SIS, New Delhi.
12. Dr. R.K. Samanta attended a workshop on "Gender Sensitization of Agricultural Policy-makers" held at NIRD, Hyderabad from Dec. 6 to 10, 1993.
13. Dr. K.P.C. Rao participated in the Workshop on Research Evaluation and Impact Assessment conducted by ICRISAT from December 13 to 15, 1993.
14. Dr. K.P.C. Rao participated in case writing workshop organized by AMDISA at Centre for Organization Development, Hyderabad from December 20 to 22, 1993.

GUEST LECTURES

The following guest lectures were organised at the Academy for the benefit of trainee scientists, faculty and staff members of the Academy.

* "Are Scientists Different?" by Prof. Parameswaran, former Head of Psychology Dept. and Dean of Management Department, Osmania University on July 17, 1993.

* "Positive Thinking," by Dr K.V. Raman, former Director of NAARM on July 31, 1993.

* "Dialogue with Nature" by Dr P.N. Murthy, Tata Consultancy Services, Hyderabad on Aug. 6, 1993.

* "The Application of Scientific Methods to Management," by Shri V.R. Raju, Chairman and Managing Director of Satyam Group of Companies on Aug. 16, 1993.

* "Intellectual Property Rights - Options for India," by Dr Robert Evenson, Professor, Yale University on Aug. 20, 1993.

* "Indian Constitution at work" by Dr G.R.S. Rao, ASCI, Hyderabad on Aug. 25, 1993.

* "Behaviour Management for Scientists " by Dr B.C. Muthaiah, NIRD on Aug. 25, 1993.

* "Agricultural Management and Emerging Trends " by Dr V.K. Gaikwad, Senior Faculty Member in the Indian Institute of Management, Ahmedabad, on Sept. 25, 1993.

* "Achievements of Research and Recent Trends in Research in Animal Sciences", by Dr M.L. Madan, Project Director of Embryo & Biotechnology Centre, NDRI, Karnal on Oct. 14, 1993.

* "Public Sector Vs Private Sector Research", by Dr I.J. Anand, Chief of Agricultural Research from M/s. Hindustan Levers Ltd., Hyderabad on Oct. 18, 1993.

- * "Animal Science Research and Management Issues" by Dr A.L. Chaudhry, Chairman of Agricultural Scientists Recruitment Board, New Delhi on Oct. 26, 1993. He also discussed matters relating to recruitment policy of ICAR.
- * "Biotechnology in Agriculture" by Dr D. Balasubramaniam, Director of Centre for Cellular & Molecular Biology (CCMB) Hyderabad, on Oct. 28, 1993.
- * "Is Hypnosis a Science?" by Dr V. Nagesh, a renowned hypnotist, on Nov. 24, 1993.
- * "Recent trends of Research in Dryland Agriculture" by Dr J.C. Katyal, Director, CRIDA on Nov. 26, 1993.
- * "How to Attain Spiritualism" by Mr M.P. Vittal Prasad on Jan. 1, 1994.
- * "Drugs and Psychotropic Substances" by Dr A.K. Bapuli, faculty member, National Police Academy (NPA) on Mar. 11, 1994.
- * "Recent Trends in Research - Dryland Crops" by Dr J.C. Katyal, Director, CRIDA on Mar. 15, 1994.
- * "Recent Trends in Research - Oilseeds Crops" by Dr M.V.R. Prasad, Project Director, DOR on Mar. 18, 1994.
- * "Rapid Rural Appraisal Techniques" by Dr B.C. Muthayya, Dy. Director General (Finance) and Director (Psychology), NIRD, on Mar. 9, 1994.
- * "Scientists and Motivation" by Dr B.C. Muthayya, Dy. Director General (Finance) and Director (Psychology), NIRD, on Mar. 26, 1994.
- * "Recent Trends in Research in Agricultural Engineering" by Dr Gnanender Singh, DDG (Engg), ICAR.
- * "Remote Sensing Applications in Agricultural Research and Development" by Dr L. Venkata Ratnam, NRSA.

VISITORS

Dr A.Lahiri, Director of National Information System for Science and Technology (NISSAT), Ministry of Science and Technology, New Delhi on July 5, 1993.

Three senior agricultural development project executives from BENIE State Agricultural and Rural Development Authority, Nigeria who were undergoing training at NISIET, Hyderabad on July 27, 1993.

A group of twenty S.B.I. Bank Managers undergoing Management Training programme at the State Bank Institute of Rural Development, Hyderabad lead by Dr I. Manickavasagam on August 20, 1993.

Dr Dick Vernon, an ISNAR Consultant from the Netherlands on Sept. 17, 1993. He acted as a facilitator for the Management Information Systems course organized from September 13 to 25, 1993.

FAO experts, Mr S.D. Hocombe and Mr J. Wolley on October 4, 1993 and had discussions with the Director and the faculty members.

Mr Edozie Uche Nwango, Commissioner of Agriculture and Natural Resources and Mr Onyeali Mark Ummuna, Programming Manager, IMO State Agricultural Development Project (ADP) from Nigeria on October 6, 1993.

Dr R.P.Singh, Vice Principal, Extension Education Institute of Nilokheri, Haryana, along with three foreign participants Mr Isnas M.Cortado, Santiago P.Souillena Vr., Jonathan P.M. Leusen Jr., from the Philippines participating in an International Course on Information, Communication and Extension Methodology for Foreign Experts under T.C.S. Colombo Plan at Haryana Agricultural University on October 7, 1993.

Twelve participants undergoing the Training Administrators Course (S.P. level) from National Police Academy on October 15, 1993.

Dr A.L. Chaudhry, chairman, Agricultural Scientists Recruitment Board, New Delhi visited the Academy on October 26, 1993.

Research Scientists from Nazret Research Centre, Ethiopia, Dr Aberrall Debelo, Dr Aberrall Deressa and Mr Girma Tegegne visited the Academy on October 26, 1993 and held discussions with the Director.

Mr Friday P. Anjishi and Mr Victor Gnangb from Zambia; Mr W.A.Lal Priyantha, Industrial Extension Officer, Industrial Development Board, Sri Lanka; Mr Terry Thomas, Training Manager, National Insurance Scheme, Guyana; Mr Sibouiso Nasslela, Swaziland Institute of Management and Public Administration, Swaziland; Mr E.M.Rweyemamu, Mr J.M.K.L. Vatax, Mr E.J.Urio, Mr Yona E.Naaman from Tanzania visited the Academy on October 29, 1993.

Dr D.Chitra Rao, Programme Director and Dr C.Rani, Faculty from NISIET, Mr L.K.Chakuluwta and Mr Pastory P.Kanluvu from Zambia visited the Academy on October 29, 1993.

Mrs S.T.Agbaceposi, Director General, Ministry of Agriculture and Mr M.A.Afinvai, Programme Manager, Lagos State, visited the Academy on November 3, 1993.

Mr Tesfaye Zebeye from Institute of Agricultural Research, Ethiopia, visited the Academy on November 4, 1993.

Dr Hamdy M.Eisa from World Bank, New Delhi, visited NAARM on November 18, 1993.

Mr C.Ohuegbe and Mr Mndi A.Sold from Nigeria visited the Academy on December 1, 1993.

Ten Nepali high level officials on study tour visited NAARM on January 10, 1994.

Prof. G.S.Z. Ssen Yonga, Secretary, MAAIF and Chris Okwele, Swrarp from Uganda visited NAARM on January 10, 1994.

Mr Hari Ram Shrestha from Nepal Agricultural Research
Council, Katmandu visited the Academy on February 10, 1994.

A five-member delegation comprising Mr Asseta Gezazegne,
Mr Gashaw Gedda and Mr Ibrahim Ahmed, Ministry of Agricul-
ture and Dr Getenet Gebeyehu, Deputy General Manager for
Research, IAR, Ethiopia visited NAARM on February 11, 1994.

Mr Willem Zijp of the World Bank, USA visited the Acad-
emy on February 23, 1994.

A five member Chinese delegation headed by Mr Han Xiang
Song, Department of Science and Technology, China visited
NAARM from February 25 to 27, 1994.

Mr Tom Brabben, Mr Ernst Schutze, Mr Bent Smedema, and
Mr Goel of the World Bank/IPTRID team visited the Academy on
February 28, 1994.

Mr John B. Mubiru, Director of Extension, Ministry of Agri-
culture, Uganda visited NAARM on March 3, 1994.

Ms Elizabeth W. Munyori, Training officer, Kenya Agricul-
tural Research Institute, Kenya visited the Academy on March
11, 1994.

Dr Israel Kbirige Sebunya, National Agricultural Research
Organisation (NARO), Kampala visited on March 30, 1994.

A three-member delegation from the Agriculture Develop-
ment Project of Nigeria visited on March 31, 1994.

NAARM ALUMNI ASSOCIATION

The NAARM Alumni Association serves the purpose of continuing the interaction of the Alumni with the Academy, and helps to keep alive the management perspective in their mind. The Association brings out a quarterly newsletter, and also encourages meetings in its local chapters. The Association had a strength of 477 members as on March 31, 1994. The office bearers of the Association for 1993-94 were as follows:

PATRON : Prof. V.L. Chopra, DG,
ICAR

PRESIDENT : Dr. C. Prasad
Director, NAARM

GENERAL SECRETARY : Mr. R.C. Chelvan
Scientist (SG)

COMMITTEES

Management Committee

The Academy is guided in planning, organizing, and conducting various types of training programmes and research studies by the Management Committee. The Committee helps in formulation and consolidation of proposals for Five Year Plan and Annual Plan, and also takes up periodical review of progress. The Management Committee assists the Director of the Academy in discharging his functions; it also focuses its attention on the research and other programmes of the Academy, and ensures their effective implementation. While examining these programmes periodically, it pinpoints bottlenecks, if any, and suggests remedial measures. The 21st meeting of the Management Committee of the Academy was held on November 20, 1993. The composition of the Management Committee of NAARM was as follows :

- | | | |
|----|---|----------|
| 1 | Dr. C. Prasad
Director, NAARM
Rajendranagar, Hyderabad | Chairman |
| 2. | Dr.P.N.Mathur
ADG (Extension)
ICAR, New Delhi | Member |
| 3. | Dr.M.S.Chari
Director, CTRI
Rajahmundry, Andhra Pradesh | Member |
| 4. | Dr.Punjab Singh
Director, IGRI
Jhansi | Member |
| 5. | Dr. A.Ahmed
DDG (Education), ICAR
New Delhi | Member |

- | | | |
|----|---|------------------|
| 6. | Mr.B.Pandu Reddy
Finance & Accounts Officer
NAARM, Hyderabad | Member |
| 7. | Mr.M.Suresh Kumar
Chief Administrative Officer
NAARM, Hyderabad | Member Secretary |

Steering Committee of the Advanced Centre on Agricultural Education and Research Management

This Committee, initially called as the Sub-Project Advisory Committee of the National UNDP Project, was instrumental in reviewing the progress of the project and for providing broad guidelines for its effective implementation. The 9th and 10th meetings of the Steering Committee of the Advanced Centre on Agricultural Education and Research Management was held on April 8 and November 16, 1993 respectively at NAARM, Hyderabad. The composition of the Committee was as follows:

- | | | |
|----|---|--|
| 1. | Dr. Jagdeesh C. Kalla
Director, NAARM, Hyderabad | Chairman
(for the 9th Meeting)
(Up to Mar. 31, 1993) |
| | Dr. C. Prasad
Director, NAARM, Hyderabad | Chairman
(for the 10th Meeting)
(From June 1, 1993) |
| 2. | Dr.Harswaroop Singh
Lt. Governor, Pondicherry | Member |
| 3. | Dr.K.V.Raman
Ex-Director, NAARM, Hyderabad | Member |
| 4. | Dr.M.V.Rao
Vice-Chancellor, APAU, Hyderabad | Member |
| 5. | Dr. Gnana Prakasam
Vice-Chancellor, TNVASU
Madras | Member |

- | | | |
|-----|---|----------------------|
| 6. | Dr. A.A. Ahmed
D.D.G (Education), ICAR, New Delhi | Member |
| 7. | Dr. S.C. Sarma
Director, NDRI, Karnal | Member |
| 8. | Dr. P.B. Mathur
A.D.G. (UNDP) & NDP, ICAR
New Delhi | Member |
| 9. | Dr. P. Joshi
Director of Research, Rajasthan
Agricultural University, Bikaner
Rajasthan | Member |
| 10. | Dr. A.P. Vyas
Director of Research, Gujarat
Agricultural University, Ahmedabad | Member |
| 11. | Dr. M.V.R. Prasad
Director, Directorate of Oilseeds
Research, Rajendranagar, Hyderabad | Member |
| 12. | Dr. V. Raghavendra Rao
Professor
NAARM, Hyderabad | Member |
| 13. | Dr. I.J. Singh
Professor, Department of
Agricultural Economics, H.A.U.
Hissar, Haryana | Member |
| 14. | Mr. M. Suresh Kumar
Chief Administrative Officer,
NAARM, Hyderabad | Member Secretary |
| 15. | Dr. S.I. Zakhariev
FAO Representative in India & Bhutan
FAO of the United Nations
55 Max Muller Marg (ex-Lodi Estate)
New Delhi | Ex-officio
Member |

Research Council

The Research Council deliberates on the research activities in the areas of agricultural research and education management. The committee consists of the following members:

- | | | |
|-----|--|----------|
| 1. | Dr. C. Prasad
Director, NAARM | Chairman |
| 2.. | Dr. Jagdeesh C.Kalla
Jt. Director, NAARM | Member |
| 3. | Dr. V. Raghavendra Rao
Principal Scientist, NAARM | Member |
| 4. | Dr. P. Kumar
Principal Scientist, NAARM | Member |
| 5. | Dr. S.N. Saha
Principal Scientist, NAARM | Member |
| 6. | Dr. K. Venkateswarlu
Sr. Scientist, NAARM | Member |
| 7. | Dr. R.K. Samanta
Sr. Scientist, NAARM | Member |
| 8. | Dr. A. Gopalam
Sr. Scientist, NAARM | Member |
| 9. | Dr. K. Purnachandra Rao
Sr. Scientist, NAARM | Member |
| 10. | Dr. K.M. Reddy
Sr. Scientist, NAARM | Member |
| 11. | Dr. M.M. Anwer
Sr. Scientist, NAARM | Member |

- | | | |
|-----|--|-------------------|
| 12. | Dr. K. Vidyasagar Rao
Sr. Scientist, NAARM | Member |
| 13. | Dr. P. Manikandan
Sr. Scientist, NAARM | Member |
| 14. | Dr. Jagannadham Challa
Sr. Scientist, NAARM | Member |
| 15. | Dr. S. Shanmugam
Sr. Scientist, NAARM | Member |
| 16. | Dr. VE. Sabarathnam
Sr. Scientist, NAARM | Member |
| 17. | Dr. D. Rama Rao
Sr. Scientist, NAARM | Member |
| 18. | Dr. A.U. Gadewar
Sr. Scientist, NAARM | Member |
| 19. | Mr. R.C. Chelvan
Scientist (SG) | Member |
| 20. | Mr. U. Muralidhar
Systems Analyst, NAARM | Member |
| 21. | Dr. T. Balaguru
Faculty Member, ARSP Unit | Member Secretary. |

Academic Council:

The Academic Council oversees all the academic functions of NAARM. The composition of the Academic Council during 1993-94 was as follows :

- | | | |
|----|----------------------------------|----------|
| 1. | Dr. C. Prasad
Director, NAARM | Chairman |
|----|----------------------------------|----------|

2.	Dr. Jagdeesh C.Kalla Jt. Director, NAARM	Member
3.	Dr. P.Kumar Principal Scientist, NAARM	Member
4.	Dr. R.K.Samanta Sr. Scientist, NAARM	Member
5.	Dr. A.Gopalam Sr. Scientist, NAARM	Member
6.	Dr. M.M. Anwer Sr. Scientist, NAARM	Member
7.	Mr. R.B. Gaddagimath In-charge, Information & Documentation unit	Member
8.	Dr. S.N. Saha Principal Scientist, NAARM	Member-Secretary

Official Language Implementation Committee

The Official Language Implementation Committee of the Academy provides periodical suggestions for implementation of Official Language Policy, and rules and regulations of Government of India that are issued from time to time. The Committee met four times during the year on June 30, September 30, December 23, 1993 and March 30, 1994, and discussed several issues relating to the implementation of Hindi language. The following were the members :

1.	Dr.C. Prasad, Director	Patron
2.	Dr.Jagdeesh C.Kalla, Jt. Director	Chairman
3.	Dr.A. Gopalam, Senior Scientist	Vice-Chairman

4.	Dr.K.P.C.Rao, Senior Scientist	Member
5.	Dr.D.Rama Rao, Senior Scientist	Member
6.	Mr. M.Suresh Kumar, Chief Administrative Officer	Member
7.	Mr. B. Pandu Reddy Finance & Accounts Officer	Member
8.	Mr. K.R.Prabhakar, Programme Officer (CCTV)	Member
9.	Mr. U.Muralidhar Systems Analyst	Member
10.	Mr. R.V.V.S.Prakasa Rao, Editor	Member
11.	Mr. Abhijit Bhattacharjee, PRO	Member
12.	Ms. Jhansi Laxmi, Sr.P.A	Member
13.	Mr. D.Venkateswarlu Technical Officer (Hindi)	Member - Secretary
